Jhana - I submitted the 213rr for yourself and two air techs to transfer from Bravo to Alpha on 9/18/17 and have lodging provided. I have you three in Corpus until Friday. Once you find out when TAGA will move out of Corpus, just let me know. Paisley said they don't have sufficient fuel at the camp, but there are plenty of un-impacted truck stops open.

This update is for TAGA Team 1 only. Team 2 route and planning to follow in another email.

For Sunday (09/17/17), Team 1 will monitor starting in Texas City and then move to Sweeny. Texas City is currently on the list under Team 2 however, since Texas City is close to Sweeny, it is more efficient to have Team 1 monitor the location. The plan is to address all the sites listed in these two locations, but if time does not allow, we will pick up the remaining facilities on Monday (09/18/17). If we can complete all facilities in Texas City and Sweeny on Sunday, we will begin to move south towards Corpus Christi where 3 EPA personnel will need lodging and fuel and other items discussed previously with REOC staff will be needed for the TAGA. If you have additional questions, let me know. Thanks.

Subject: Air Monitoring Group-Daily Update

The air monitoring group, which includes four 6EN air technical specialists, conducted TAGA monitoring of Exxon Mobil Baytown Refinery, Exxon Mobil Baytown Chemical Plant, Exxon Mobil Baytown Olefins Plant, and the adjacent communities to the west, north, and southeast. The TAGA also monitored Enterprise - Mont Belvieu Complex, Equistar Chemicals - Channelview Complex (labeled as Lyondellbasell Channelview in Google), And Phillips 66 Pipeline - Pasadena Product Terminal. No readings of significance were identified.

No monitoring will be conducted by the TAGA on 09/16/17. Monitoring will resume on Sunday, 09/17/17, and at this time is planned for Texas City, Texas. This area was initially planned for Team 2 however, since logistics is still planning for the two teams, Texas City is closer to the Houston Lab. Mickunas and Enders to discuss the Team 1 route tomorrow. If plans change regarding Texas City monitoring on Sunday, the REOC will be notified.
